

DCFNDU: Understanding Cisco Data Center Foundations v1.0

Course Code: DCFNDU

Duration: 5 days

Instructor-led Training (ILT) | Virtual Instructor-led Training (VILT)

OVERVIEW

The Understanding Cisco Data Center Foundations (DCFNDU) v1.0 course helps you prepare for entry-level data center roles. In this course, you will learn the foundational knowledge and skills you need to configure Cisco® data center technologies including: networking, virtualization, storage area networking, and unified computing. You will get an introduction to Cisco Application Centric Infrastructure (Cisco ACI), automation and cloud computing. You will get hands-on experience with configuring features on Cisco Nexus Operating System (Cisco NX-OS) and Cisco Unified Computing System (Cisco UCS). This course also earns you 30 Continuing Education (CE) credits towards recertification.

This course does not lead directly to a certification exam, but it does cover foundational knowledge that can help you prepare for several CCNP and other professional-level data center courses and exams:

DCCOR: [Implementing and Operating Cisco Data Center Core Technologies](#)

DCID: [Designing Cisco Data Center Infrastructure](#)

DCIT: [Troubleshooting Cisco Data Center Infrastructure](#)

DCACI: [Implementing Cisco Application Centric Infrastructure](#)
