

FT-FMG: FortiManager Training

Course Code: FT-FMG

Duration: 2 days

Instructor-led Training (ILT) | Virtual Instructor-led Training (VILT)

OVERVIEW

In this two-day class, you will learn the fundamentals of using FortiManager for centralized network administration of many FortiGate devices.

In interactive labs, you will explore deployment strategies, which include single or multiple ADOMs, device registration, policy packages, shared objects, installing configuration changes, provisioning FortiManager as a local FortiGuard distribution server, and troubleshooting the features that are critical to day-to-day use after you deploy FortiManager.

SKILLS COVERED

After completing this course, you will be able to:

- Describe the key features and capabilities of FortiManager
- Deploy administrative domains (ADOMs) to support multiple customers on a single FortiManager
- Restrict concurrent ADOM access by using workspaces and workflow mode
- Use provisioning templates for device-level changes across many devices
- Identify the synchronization states and manage the revision history of managed devices
- Manage firewall policies across multiple FortiGate devices using policy packages with shared and dynamic objects
- Deploy policies and objects from the global ADOM to multiple ADOMs

- Understand Security Fabric integration with FortiManager
- Deploy SD-WAN using central management
- Describe high-availability (HA), backup, and recovery options for FortiManager
- Manage the firmware of supported devices centrally
- Offer a local FortiGuard distribution server to your Fortinet devices
- Diagnose and troubleshoot import and installation issues

WHO SHOULD ATTEND?

- Anyone who is responsible for the day-to-day management of FortiGate security policies using the FortiManager platform.

PREREQUISITES

- Knowledge of firewall concepts in an IPv4 network
- Familiarity with all topics in FortiGate Security and FortiGate Infrastructure
- Basic understanding of network management systems

MODULES

Module 1: Introduction and Initial Configuration

Module 2: Administration and Management

Module 3: Device Registration

Module 4: Device-Level Configuration and Installation

Module 5: Policy and Objects

Module 6: SD-WAN and Security Fabric

Module 7: Diagnostics and Troubleshooting

Module 8: Additional Configuration
