

**OC-CF: Oracle Coherence Cloud
Fundamentals Ed 1**

Course Code: OC-CF

Duration: 1 day

Instructor-led Training (ILT) | Virtual Instructor-
led Training (VILT)**OVERVIEW**

This course offers the all right information to begin your journey with Oracle Coherence Cloud. This course will take you through some basics of networking, which is required to learn the concepts of Coherence Cloud. You will be exploring the capabilities and architecture of Coherence Cloud. You will learn to provision Coherence Cluster in a private and public subnet. Explore to use Resource Manager to view the cloud resources of a cluster. Learn to delete the cluster service. You will also learn to modify the operational override file and scale-out the cluster.

SKILLS COVERED

- Get Familiar with the architecture and capabilities of Oracle Coherence Cloud.
- Provision a Cluster with Oracle Coherence Cloud.
- Manage a Coherence Cloud Cluster.
- Scale-out a Coherence Cluster.

WHO SHOULD ATTEND?

- Cloud Application Developer.
- Cloud Administrator.

PREREQUISITES

- Basic Computer Knowledge.

MODULES**Module 1: Get Started with Oracle Coherence
Cloud**

- About Oracle Cloud Infrastructure Networking Concepts
- Understanding the Capabilities of Oracle Coherence Cloud
- Describing Architecture of Oracle Coherence Cloud

**Module 2: Creating a Cluster with Oracle
Coherence Cloud**

- Provisioning a Coherence Cluster in a Public Subnet
- Instantiating a Coherence Cluster in a Private Subnet
- Accessing the Cloud Resources for a Cluster

**Module 3: Managing a Cluster in Oracle
Coherence Cloud**

- Using the Resource Manager to Destroy a Cluster
- Deleting a Cluster

Module 4: Scaling out a Coherence Cluster

- Understanding the Concept of Scaling
- Modifying an Operational Override File
- Scaling Out the Cluster
