

OCI-WA: Working with Ansible on OCI Ed 1

Course Code: OCI-WA

Duration: 2 days

Instructor-led Training (ILT) | Virtual Instructor-led Training (VILT)

OVERVIEW

Ansible provides you a solution to the tedious task of administering a server fleet. Ansible provides a platform for configuring and managing compute instances.

In this course, you will learn the basics of working with Ansible in OCI, including installation and configuration. Also, you will discover the benefits of Infrastructure as Code (IaC) via Ansible, understand and create the building blocks for Ansible to be used in the form of playbooks. Lastly you will be able to create playbooks and configure and manage resources on OCI.

SKILLS COVERED

After completion of this course, the participant will be able to:

- Install Ansible
- Execute ad-hoc Ansible commands
- Create and execute Ansible Playbooks
- Use Ansible to create OCI resources

WHO SHOULD ATTEND?

This course is designed for:

- Cloud Administrator
- DevOps Engineer

PREREQUISITES

- Oracle Cloud Infrastructure Administration Essentials

MODULES

Module 1: Introduction to Ansible: Overview and Setup

Module 2: Using Ansible

Module 3: Ansible on OCI
