

TL112: Red Hat Transformational Learning: Introduction to Pragmatic Site Reliability Engineering

Course Code: TL112

Duration: 2 days

Instructor-led Training (ILT) | Virtual Instructor-led Training (VILT)

OVERVIEW**A pragmatic introduction to the Site Reliability Engineering implementation of DevOps**

Red Hat Transformational Learning: Introduction to Pragmatic Site Reliability Engineering (TL112) teaches the vocabulary, concepts and cultural considerations required to prepare to adopt an implementation of DevOps referred to as Site Reliability Engineering (SRE). In this course, the history, definitions, and Red Hat specific take on this practice will be explored as the student prepares to continue the learning path of joining or implementing an SRE team.

SKILLS COVERED**Impact on the organization**

- Organizations moving toward DevOps transformation may consider implementing practices defined in Site Reliability Engineering. This course provides the fundamental concepts and terminology required for teams to speak a common language and gain a shared understanding of how to implement SRE within their teams.

Impact on the individual

- After successfully completing this course, a student will gain an understanding of Site Reliability

Engineering and how it relates to their understanding of the role and fit within an organization. The student will be prepared to continue the Transformational Learning path.

WHO SHOULD ATTEND?

- DevOps Practitioners
- System Administrators
- Software Developers

PREREQUISITES

- There are no prerequisites required to attend this course.

MODULES**Module 1: Introduction to Site Reliability Engineering**

- Compare and contrast traditional systems administration with Site Reliability Engineering (SRE) and DevOps.

Module 2: Determining Operational Readiness

- Determine if your organization is ready to adopt SRE principles

Module 3: Describing Toil and Implementing Automation

- Define and describe toil and how to leverage automation.

Module 4: Explaining and Calculating Error Budgets

- Explain the importance of setting error budgets

Module 5: Explaining Incident Management

- Describe incident management and the relationship to Site Reliability Engineering
