

EDU-AOLICM: VMware Aria Operations for Logs: Install, Configure, Manage

Course Code: EDU-AOLICM

Duration: 3 days

Instructor-led Training (ILT) | Virtual Instructor-led Training (VILT)

OVERVIEW

This three-day course features hands-on training that focuses on deploying, configuring, and managing VMware Aria Operations™ for Logs 8.12. You will learn the UI enhancements, features, architecture, use cases, and benefits of VMware Aria Operations for Logs. This course provides you with the knowledge and skills to use VMware Aria Operations for Logs 8.12 to monitor your environment.

SKILLS COVERED

- Identify the features and benefits of VMware Aria Operations for Logs
- Determine which VMware Aria Operations for Logs cluster meets your monitoring requirements
- Describe the VMware Aria Operations for Logs architecture
- Describe the primary functions of the VMware Aria Operations for Logs UI
- Deploy and configure a VMware Aria Operations for Logs cluster
- Use the Explore Logs page to understand the log data
- Create and manage queries • Create custom dashboards
- Describe user access control
- Manage VMware Aria Operations for Logs agents and agent groups
- Extend the capabilities of VMware Aria Operations for Logs by adding content packs and configuring solutions

- Describe how to integrate VMware Aria Operations™ with VMware Aria Operations for Logs

WHO SHOULD ATTEND?

- System administrators
- System engineer
- Consultants

PREREQUISITES

System administration experience with VMware vSphere® deployments or completion of one of the following courses:

- [VMware vSphere: Install, Configure, Manage \[V8\]](#)
- [VMware vSphere: Operate, Scale, and Secure \[V8\]](#)

MODULES

Module 1: Course Introduction

- Introductions and course logistics
- Course objectives

Module 2: Introduction to VMware Aria Operations for Logs

- Describe the cloud management platform
- Describe the VMware Aria™ use cases
- Describe the key capabilities of VMware Aria Operations for Logs
- Explain the importance of efficient log management
- Navigate the VMware Aria Operations for Logs UI
- Describe the various stages of log processing

Module 3: VMware Aria Operations for Logs Architecture and Deployment

- Identify the minimum requirements for deploying VMware Aria Operations for Logs
- Explain how to use the VMware Aria Operations for Logs sizing calculator
- Describe VMware Aria Operations for Logs compatibility with other VMware products
- Describe the VMware Aria Operations for Logs architecture
- Explain how to install the VMware Aria Operations for Logs virtual appliance

Module 4: Analyzing Logs

- Describe the primary functions of the VMware Aria Operations for Logs UI
- Describe log events
- Use Explore Logs to understand the log data
- Create and manage queries
- Extract fields in VMware Aria Operations for Logs

Module 5: Using Dashboards, Alerts, and Reports

- Explain how to create custom dashboards
- Describe how to use the VMware Aria Operations for Logs widgets
- Create alerts
- Explain how to view and manage reports

Module 6: Administering VMware Aria Operations for Logs

- Describe user access control in VMware Aria Operations for Logs
- Describe user management
- Define roles and permissions

- Configure VMware Aria Operations for Logs settings

Module 7: Managing Content Packs, Certificates, and Agents

- Install and manage content packs
- Manage certificates
- Install and manage agents for VMware Aria Operations for Logs
- Describe the VMware Aria Operations for Logs Importer

Module 8: VMware Aria Operations for Logs Integrations

- Describe how to integrate VMware Operations for Logs with VMware Aria Operations
- Discuss the advantages of integration
- Discuss the vSAN and NSX content pack

END OF PAGE
